PROFESSIONAL SYMMARY

Full Stack Developer with practical experience in designing and deploying scalable, production-ready web applications using Java, Spring Boot, React, and MySQL. Skilled in building secure and efficient RESTful APIs with JWT-based authentication and role-based access control. Proficient in modern frontend development using React, TypeScript, and TanStack Query to create responsive and high-performance user interfaces. Hands-on experience with Docker-based deployment, caching using Redis, and version control using Git. Strong understanding of system design, client-server architecture, and performance optimization. Passionate about delivering clean, maintainable code and continuously improving through real-world projects and collaborative development.

TECHNICAL SKILLS

- **Languages:** Java, JavaScript (ES6+), TypeScript, Python, C++, SQL
- **Frontend:** React.js, Redux, HTML5, CSS3, Tailwind CSS, React Hook Form, Zod, TanStack Query, Responsive Web Design
- **Backend:** Node.js, Express.js, Spring Boot, Spring Security, Spring Data JPA, Hibernate, JDBC, MVC Architecture, RESTful API Development
- **Authentication & APIs:** REST APIs, JWT, OAuth2, Role-Based Access Control (RBAC), CORS, API Integration, Request Validation, Razorpay Payment Gateway
- **Databases & Caching:** MySQL, PostgreSQL, MongoDB, Mongoose, Redis, RDBMS
- **Networking & Communication:** TCP/IP, HTTP/HTTPS, WebSocket, FTP, CORS, Client-Server Architecture
- **Development & DevOps:** Git, GitHub, Docker, Maven, Postman, Linux, Netlify, Vercel, Koyeb
- **React & Performance:** Custom Hooks, useCallback, useMemo, Debouncing, Pagination, Infinite Scrolling, Component Reusability, Performance Optimization
- **Software Engineering:** Object-Oriented Programming (OOP), Data Structures & Algorithms, System Design, SDLC, STLC, Client-Server Architecture, HTTP/HTTPS, Clean Architecture

PROFESSIONAL EXPERIENCE

React Developer Intern

Wyreflow Technologies – Bhopal, Madhya Pradesh (Remote)

May'2026 – Aug'2026

- Contributed to the development of a real-world job portal application for a client, primarily working on frontend development while also supporting backend architecture and API development.
- Built responsive and reusable user interfaces using React.js, JavaScript, Tailwind CSS, and reusable components, ensuring cross-device compatibility and an improved user experience.
- Integrated and optimized REST APIs, resolving API-related issues, improving data-fetching efficiency, and ensuring reliable frontend-backend communication.
- Developed and maintained backend services using Node.js, Express.js, and MVC architecture, designing a scalable structure for controllers, routes, models, and business logic.
- Worked with MongoDB and Mongoose to design schemas, manage application data, and implement efficient database operations for the job portal backend.

- Implemented backend security and integration features including CORS, OAuth-based authentication, and Razorpay payment gateway integration.
- Implemented Zod for both frontend form validation and backend request validation, ensuring consistent data validation and improved application reliability.
- Implemented frontend performance optimizations including debouncing, pagination, and infinite scrolling to improve search performance, data loading, and application responsiveness.
- Developed and optimized forms using React Hook Form and Zod, handling validation, error states, and user input management efficiently.
- Applied advanced React concepts including Custom Hooks, useCallback, and useMemo to improve code reusability, rendering performance, and application efficiency.
- Debugged and resolved frontend and backend issues, including UI defects, API failures, validation issues, and integration problems, improving overall application stability.
- Collaborated remotely with developers, testers, and team members to troubleshoot reported issues, implement fixes, and continuously improve application functionality.

Java Developer Intern

Codesoft – Remote

Jul'2024 – Aug'2024

- Designed and developed a Currency Converter application using Java, implementing dynamic conversion logic and efficient input validation for accurate results.
- Built an ATM Machine System using core Java, simulating real-world banking operations such as cash withdrawal, deposit, balance inquiry, and transaction handling.
- Applied Object-Oriented Programming (OOP) principles including encapsulation and modular design for better code maintainability and scalability.
- Implemented error handling to ensure system reliability and prevent invalid operations.
- Focused on writing clean, structured, and reusable code following best coding practices.

Web Development Intern

Octanet Service Pvt Ltd – Remote

Nov'2024 – Dec'2024

- Designed and developed a fully responsive web page ensuring compatibility across multiple devices, including desktops, tablets, and mobile screens.
- Used modern frontend technologies like HTML5, CSS3, and JavaScript to create an interactive and user-friendly interface.
- Optimized the application for performance by reducing unnecessary code and improving page load speed.
- Ensured cross-browser compatibility for consistent user experience.
- Deployed and hosted the application using Netlify, enabling continuous access and live testing.
- Improved UI/UX by maintaining clean layouts, proper spacing, and intuitive navigation.

ACADEMIC PROJECTS

FormSync

React, TanStack Query, Tailwind CSS, Spring Boot, Spring Security, MySQL, Docker, Redis

([Live Demo](#) | [GitHub](#))

- Developed a full-stack web application for form submission and management, enabling users to securely submit, store, and manage form data through a centralized dashboard.
- Built scalable RESTful APIs using Spring Boot to handle form creation, retrieval, and deletion operations efficiently.

- Implemented JWT-based authentication and role-based access control, ensuring secure access to user-specific data.
- Integrated Spring Security to manage authentication workflows and protect endpoints from unauthorized access.
- Designed a responsive and dynamic frontend using React and Tailwind CSS, improving user experience across devices.
- Used TanStack Query for efficient data fetching, caching, and synchronization between client and server.
- Containerized the application using Docker for consistent deployment and easier environment management.
- Focused on performance optimization, clean UI design, and modular code structure for scalability and maintainability.

Attendix

React, TypeScript, TanStack Query, Spring Boot, Spring Security, MySQL, Redis
[\(GitHub\)](#)

- Developed a full-stack attendance management system allowing users to mark, track, and manage attendance records efficiently.
- Implemented secure user authentication and authorization using Spring Boot and Spring Security to ensure data privacy and controlled access.
- Designed and developed a responsive frontend using React, TypeScript, and Tailwind CSS, enhancing type safety and maintainability.
- Integrated TanStack Query for optimized data fetching and state management, reducing unnecessary API calls and improving application performance.
- Utilized Redis for caching to improve response time and handle frequent data access efficiently.
- Structured backend services using clean architecture principles for better scalability and separation of concerns.
- Ensured smooth user experience with fast UI updates, efficient data handling, and optimized backend performance.

ACHIEVEMENTS

- Participated in 3+ university-level hackathons and code fests, contributing to team-based solutions for real-world problems
- Active member of **Codex Club**, a student-led tech club focused on coding, collaboration, and technical growth.

CERTIFICATIONS

• Fundamentals of Software Engineering – Dec’2023(link)	<i>Saylor Academy</i>
• Building Scalable React UI Component – Oct’2025(link)	<i>Linkedin</i>
• Learning Spring 6 with Spring Boot 3 – Oct’2025(link)	<i>Linkedin</i>
• Java: Advanced Concepts for High-Performance Development – Oct’2025(link)	<i>Linkedin</i>
• Master Java Concurrency & Multithreading – Oct’2025(link)	<i>Saylor Academy</i>

EDUCATION

Quantum University	<i>Roorkee, Uttarakhand</i>
Bachelor of Computer Application	<i>2023 – 2026</i>
Manipal University	<i>Remote</i>
Master of Computer Applications	<i>2026 – 2028</i>
